About

- Experienced Software Engineer with over 2.5+ years of industry experience. Having diverse skill set and a proven track record of delivering successful projects.
- My expertise lies in **Nodejs, React, Nextjs, Typescript and JavaScript**, and I have a strong passion for technology and innovation.
- Successfully designed, developed, and implemented complex and scalable applications using React ensuring optimal performance and efficiency.
- Passionate about staying up-to-date with the latest trends and technologies, continuously seeking opportunities to improve and excel in a fast-paced and dynamic tech landscape.
- Demonstrated strong leadership and communication skills, mentoring and guiding junior team members to achieve exceptional results.

Technical Skills

Languages: C, Typescript, JavaScript, HTML, CSS, JQuery

Technologies/Frameworks/Libraries: React JS, NextJS, GraphQL, Nodejs, Expressjs, Redux, Ant Design, Material UI, Tailwind CSS, Styled-Component, scss,

LLM: Open Ai

Tools: Git, Jenkins, Jira, Atlassian Suite,

Database: Firebase, MongoDB Atlas

Cloud Platform: AWS

Other: Data Structure and Algorithms, Responsive Design, SEO Optimization

Work Experience

Freelance

May 2024 – Present

Frontend Engineer

Remote

- **Bizalliance Technologies** (Frontend Engineer)
- Built a dynamic and scalable frontend architecture using React, improving page load speeds by 30%.
- Developed reusable components and established a Redux store for efficient state management, supporting 10,000+ users daily.
- Translated Figma designs into responsive, pixel-perfect UIs, reducing implementation time by 20%.
- **Zamani Tech Ventures** (Frontend Engineer)
- Migrated the Toffemoney app to Next.js, enhancing performance by 25%.
- Created highly scalable, reusable components, resulting in a 15% improvement in maintainability.
- Building highly scalable, reusable components to enhance performance, maintainability, and scalability.
- Ensure that code and technical documentation are maintained and up-to-date

Warlands CORP S.L.U

Sep 2023 – May 2024

Full Stack Engineer

Remote

- Developed core functionalities for the Dawn of Factions web3 game, contributing to a 15% increase in player retention.
- Designed interactive game UIs and implemented scalable features, reducing errors by 30%.
- Collaborated with product owners to design interactive game UI.
- Provide technical guidance and leadership to the development team, ensuring adherence to best practices and coding standards.
- Ensure that code and technical documentation are maintained and up-to-date.

CodexShark

June 2022 – August 2023

Full Stack Engineer

Remote

- Led the frontend optimization for Restoration Hardware, expanding the platform to 5+ countries.
- Enhanced or optimised the performance of UI code and BFF code, reducing load times by 40% .
- Provide technical guidance and leadership to the development team, ensuring adherence to best practices and coding standards.
- Migrated VAIONEX's applications to Next.js, cutting maintenance overhead by 30%
- Troubleshoot and resolve complex technical issues, working closely with the team to find solutions.
- Enhanced Zau's admin portal, increasing user task efficiency by 20%

Open Sense Labs

Sep 2021 – May 2022

Software Developer

Remote

- **Fort Myers** (Frontend Engineer)
- Contributed to a high-traffic travel website project using React js.
- Collaborated with product management and backend teams to developed a highly scalable search page.
- Improved Fort Myers' travel site performance, reducing page load time by 40%.
- **Edredo** (Frontend Engineer)
- My responsibilities to develop highly scalable, reusable and attractive UI components.
- Migrated Edredo's LMS platform from React to Next.js, boosting scalability and reducing code size by 25%

Education

Bipin Tripathi Kumaun Institute Of Technology

2018 - 2022

Bachelor of Technology (B. Tech) in Electronics and Communication Engineering

Uttarakhand, India

Projects

Netflix-Clone | React, Tailwind CSS, Context API, Firebase

- In this project I covered the frontend portion of Netflix. Used React router for routing, Tailwind Css for themeing and FIREBASE for backend.

Cryptoverse | React, Redux, Chart.js, Axios

- Made a Crypto verse application. Where we can get all news about crypto currencies, as well as live prices using coin ranking Api.

Pokemon-Card | HTML, CSS, JavaScript

- Made a pokemon card generator using Javascript. And getting the data of Pokémon's via API's.

Share-me App | React, Redux, Sanity.io

- Made a shareme web app using React. And used Sanity.io for backend. It's a photo sharing social media app.

Achievements

- **Qualified** - Hacktober Fest2020 (6 accepted PR using C and JavaScript)
- **Qualified** - Hacktober Fest 2021 (4 PR accepted using Javascript)
