- Ensure that code and technical documentation are maintained and up-to-date.

**CodexShark**                                                        **June 2022 – August 2023**
*Full Stack Engineer*                                                                    *Remote*

- **RESTORATION HARDWARE** (Lead Frontend Engineer)

- My responsibilities include guiding the design and implementation to scale their existing site to EU countries (UK, Germany, Belgium, Spain and France)

- Enhanced or optimised the performance of UI code and BFF code.

- Developed a highly scalable catalog aggregator service in BFF layer which is responsible to deliver the inventory data on the basis of country.

- Provide technical guidance and leadership to the development team, ensuring adherence to best practices and coding standards.

- Troubleshoot and resolve complex technical issues, working closely with the team to find solutions.

- Ensure that code and technical documentation are maintained and up-to-date

- **VAIONEX**   (Full-Stack Developer)

- Designed and developed highly scalable services for a their applications (SESIRE and BitcoinSV)

- I smoothly migrated their existing website to Nextjs and also enhance the application performance with scalability and less maintenance

- Worked closely with team to find solutions of complex issues.

- Ensure that code and technical documentation are maintained and up-to-date

- **Zaui**   (Frontend Engineer)

- Designed and developed highly scalable admin system to manage their portal

- Developed a scalable and low maintenance UI from scratch in Vue js.

- Collaborated with product management and backend teams to define requirements and design intuitive user interfaces, resulting in a 25 percent increase in user satisfaction

- Ensure that code and technical documentation are maintained and up-to-date

**Open Sense Labs**                                                         **Sep 2021 – May 2022**
*Software Developer*                                                                      *Remote*

- **Fort Myers**   (Frontend Engineer)

- Contributed to a high-traffic travel website project using React js.

- Collaborated with product management and backend teams to developed a highly scalable search page.

- Enhanced 40 percent page load time.

- **Edredo**   (Frontend Engineer)

- My responsibilities to develop highly scalable, reusable and attractive UI components.

- Contributed to migrate the previous site from react to Next js with existing functionality.

- Reduced the code size with existing functionality and enhance the performance as well   .

## Technical Skills

**Languages**: C,Typescript, JavaScript,HTML,CSS,Jquery
**Technologies/Frameworks/Libraries**: React JS, NextJS, Graphql, Nodejs, Expressjs, Redux, Ant Design, Material UI,Tailwind CSS, Styled-Component, scss,
**Database**: Firebase, MongoDb Atlas
**Other**: Data Structure and Algorithms, Git, Atlassian, Aws,Jenkins

## Education

**Bipin Tripathi Kumaun Institute Of Technology**                                         **2018 - 2022**
*Bachelor of Technology (B. Tech) in Electronics and Communication Engineering*         *Uttrakhand, India*

## Projects

**Netflix-Clone** | *React, Tailwind CSS, Context API, Firebase*
- In this project I covered the frontend portion of Netflix. Used React router for routing, Tailwind Css for themeing and FIREBASE for backend.

**Cryptoverse** | *React,Redux,Chart.js, Axios*
- Made a Crypto verse application. Where we can get all news about crypto currencies, as well as live prices using coin ranking Api.

**Pokemon-Card** | *HTML, CSS, JavaScript*
- Made a pokemon card generator using Javascript. And getting the data of Pokémon's via API's.

**Share-me App** | *React,Redux,Sanity.io*
- Made a shareme web app using React. And used Sanity.io for backend. It's a photo sharing social media app.

## Achievements

- **Qualified** - Hacktober Fest2020 (6 accepted PR using C and JavaScript)
- **Qualified** - Hacktober Fest 2021 (4 PR accepted using Javascript)
